Container Statistics

About Container Statistics

The information presented on this website is provided free of charge. When sourcing this data, please credit the Port of Los Angeles. Real-time shipping data may be found on the Port's Cargo Operations Dashboard.

Provided statistical breakdowns include monthly and annual container counts measured in Twenty-Foot Equivalent Units (TEUs), a standardized maritime industry measurement used when counting cargo containers of varying lengths.

Container statistics for the prior month are published during the second half of the following month.

Click [here](#) to subscribe to the Port of Los Angeles email distribution list. After entering your name and email address, be sure to select CARGO UPDATES.

Latest Monthly Container Counts

The table below shows container counts (TEUs) for the latest recorded month.

Statistics for the prior month are released on or around the 15th day of the following month.

August	2026	2025	Change	% Change
Loaded Imports	500,301.50	504,514.25	(4,212.75)	-0.84%
Loaded Exports	115,561.25	127,378.75	(11,817.50)	-9.28%
Total Loaded	615,862.75	631,893.00	(16,030.25)	-2.54%
